Color

Color ratio

Common Color Usage

Although the use of the color palette should be an even ratio of brand colors; this color usage chart gives an accurate color range for most BBVA designs and layouts.

1. **BBVA Grey 200** HEX #F7F8F8 | RGB 247, 248, 248
2. **BBVA White 100** HEX #FFFFFF | RGB 255, 255, 255
3. **BBVA Electric Blue** HEX #001391 | RGB 0, 19, 145
4. **BBVA Midnight Blue** HEX #070E46 | RGB 7, 14, 70
5. **BBVA Serene Blue** HEX #85C8FF | RGB 133, 200, 255
6. **BBVA Grey 300** HEX #E2E6EA | RGB 226, 230, 234

Surfaces

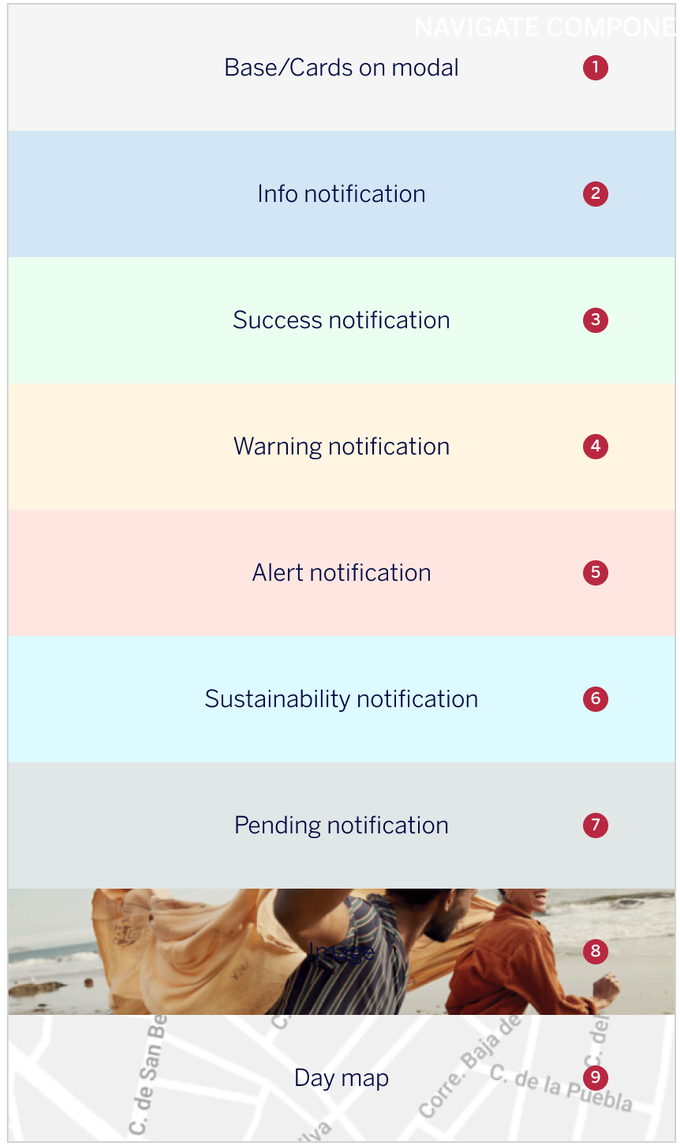
The surfaces are the layers that make up the structure of our system and where the various pieces and more atomic components of the system are placed on. There are six main groups based on their semantic porpuse: primary, primary-alt, secondary, highlight, accent and decorative. Their values vary depending on the segment and color mode:

Primary surfaces

All color tokens within these surfaces will contain the prefix "primary.": ***color.primary.category.name.state***

Bug report

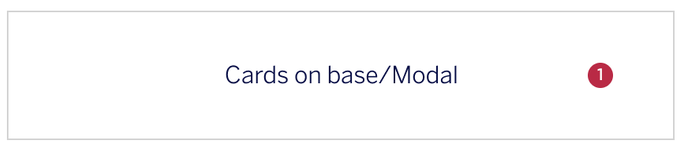
Privacy & Cookies Policy



1. Base & Cards on modal:
Default: color.primary.surface.base.default
Pressed: color.primary.surface.base.pressed
2. Info notification:
Default: color.primary.surface.info.default
Pressed: color.primary.surface.info.pressed
3. Success notification:
Default: color.primary.surface.success
4. Warning notification:
Default: color.primary.surface.warning
5. Error notification:
Default: color.primary.surface.alert
6. Sustainability notification:
Default: color.primary.surface.sustainability
7. Pending notification:
Default: color.primary.surface.pending
8. Image (Without overlay)
9. Map

Primary alternative surfaces

All color tokens within these surfaces will contain the prefix "primary-alt.": ***color.primary-alt.category.name.state***



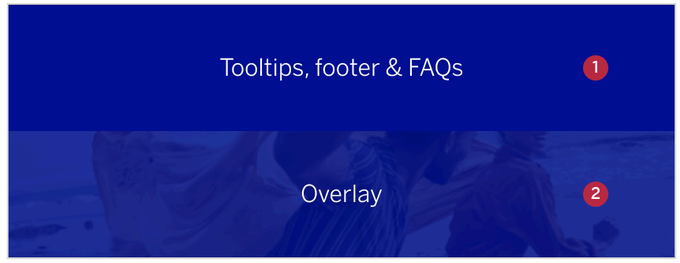
1. Cards on base & Modal:
Default: color.primary-alt.surface.base.default
Pressed: color.primary-alt.surface.base.pressed

Secondary surfaces

Bug report

Privacy & Cookies Policy

All color tokens within these surfaces will contain the prefix "secondary.": ***color.secondary.category.name.state***



1. Highlighted cards & Tooltips:
Default: color.secondary.surface.base.default
Pressed: color.secondary.surface.base.pressed

2. Overlay (From 1% to 99% of opacity):
Default: color.secondary.surface.overlay

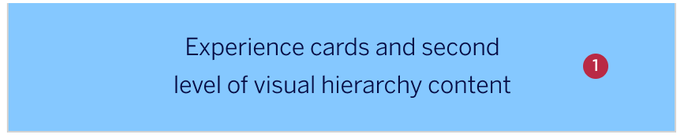
Highlight surfaces

All color tokens within these surfaces will contain the prefix "highlight.": ***color.highlight.category.name.state***

1. Offer cards and first level of visual hierarchy content:
Default: color.highlight.surface.base.default
Pressed: color.highlight.surface.base.pressed

Accent surfaces

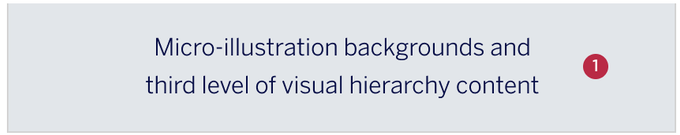
All color tokens within these surfaces will contain the prefix "accent.": ***color.accent.category.name.state***



1. Experience cards and second level of visual hierarchy content:
Default: color.accent.surface.base.default
Pressed: color.accent.surface.base.pressed

Decorative surfaces

All color tokens within these surfaces will contain the prefix "decorative.": ***color.decorative.category.name.state***



1. Micro-illustration backgrounds and third level of visual hierarchy content:
Default: color.decorative.surface.base.default
Pressed: color.decorative.surface.base.pressed

Brand Segments

Bug report
Privacy & Cookies Policy

Use in segments

The color of the ambient surfaces will change depending on the segment of the client:

Retail/Enterprise

color.primary.surface.base.default

color.primary-alt.surface.base.default

color.secondary.surface.base.default

color.highlight.surface.base.default

color.accent.surface.base.default

color.decorative.surface.base.default

High Value

color.primary.surface.base.default

color.primary-alt.surface.base.default

color.secondary.surface.base.default

color.highlight.surface.base.default

color.accent.surface.base.default

color.decorative.surface.base.default

Youths

color.primary.surface.base.default

color.primary-alt.surface.base.default

color.secondary.surface.base.default

color.highlight.surface.base.default

color.accent.surface.base.default

color.decorative.surface.base.default

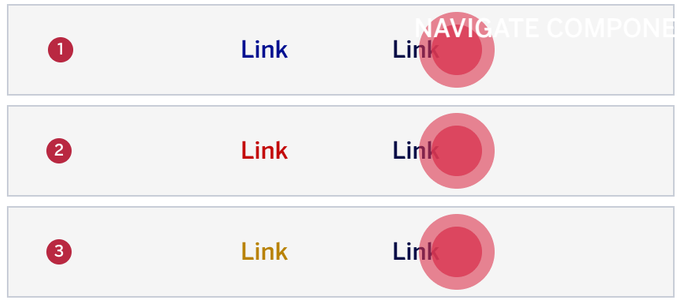
Links

Link on ambient surfaces

The token always follows the same structure. The only part that changes is the item after color. , which corresponds to the ambient or being applied. This could be: primary/primary-alt/secondary/highilight/accent/decorative

Bug report

Privacy & Cookies Policy



1. Action link:
Default: color.primary.text.action.default
Pressed: color.primary.text.action.pressed

2. Delete link:
Default: color.primary.text.negative.default
Pressed: color.primary.text.negative.pressed

3. Log link:
Default: color.primary.text.log.default
Pressed: color.primary.text.log.pressed

Focus State

An element is in the "focus" state when it is selected and ready to receive an action. Typically triggered when the user clicks or navigates with the keyboard

This state is only used on Desktop. We will use the Interactive Area of the component as a base, this area is variable depending on the component, we will add two strokes: A outside stroke of 2px and another outside of 4px.

DEFINITION

1. Interactive area
2. Focus state line:
Outside stroke 2px
Outside stroke 4px

Focus state on ambient surfaces

The token always follows the same structure. The only part that changes is the item after color. , which corresponds to the ambient or being applied. This could be: primary/primary-alt/secondary/highilight/accent/decorative

1. Focus:
Inner line: color.primary.ui-system.focus-in
Outer line: color.primary.ui-system.focus-out

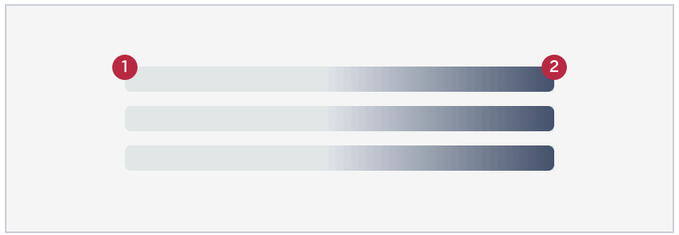
Preloaders

Skeleton on ambient surfaces

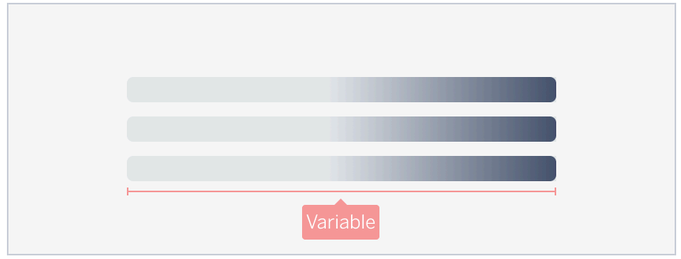
The token always follows the same structure. The only part that changes is the item after color. , which corresponds to the ambient or being applied. This could be: primary/primary-alt/secondary/highilight/accent/decorative



Preloading bars:
Bar base: color.primary.system-ui.skeleton
Bar animation: color.primary.system-ui.skeleton-loader

Bug report
Privacy & Cookies Policy

Type Text / Type Amount in preloading state



The basic components **Type Text** / **Type Amount** in their preloading state have the ability to adapt to the content width. In other words, if a wider width is required, this parameter can be configured. This allows for the construction of all system compositions according to the specific needs.

Gradients for youth

Motion Table Guidelines

Element	Animated Property	Value	Duration	Easing	Delay	Loop	Movement Description
body	background-position	0% 50% → 100% 50% → 0% 50%	15s	ease	0s	infinite	The background moves smoothly along the X-axis, simulating a continuous and gentle flow of color between green and light blue tones.
body	background-size	400% 400% (constant)	-	-	-	-	It expands the gradient to allow a visible movement without cuts or abrupt repetitions.
body	background	linear-gradient(-45deg, #88E783 (lime), #8BE1E9 (ice)	-	-	-	-	-
