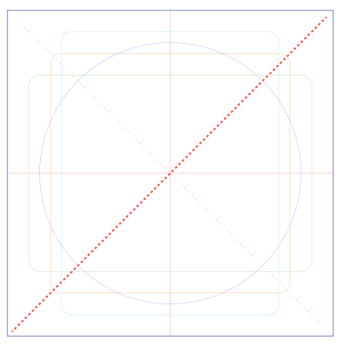
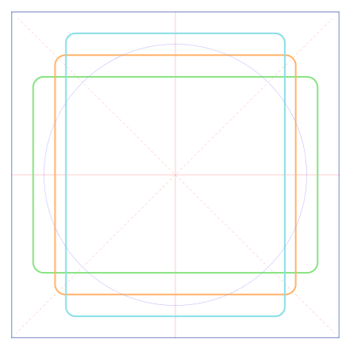
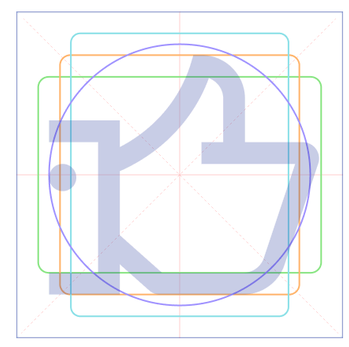
Icon Grid

The Icon Grid establishes a set of clear rules for standardizing graphic elements, in order to create a flexible and consistent system. To successfully create an icon, it is important to design at 100% scale with guides aligned to grid.

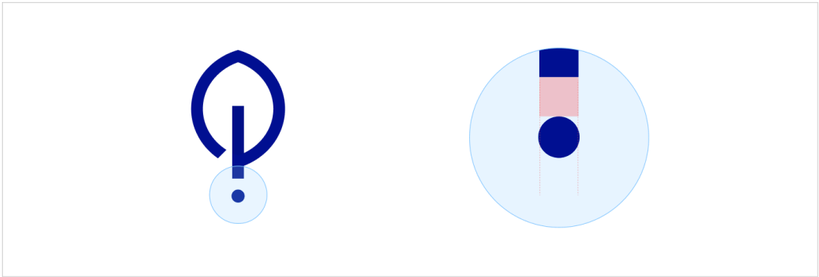






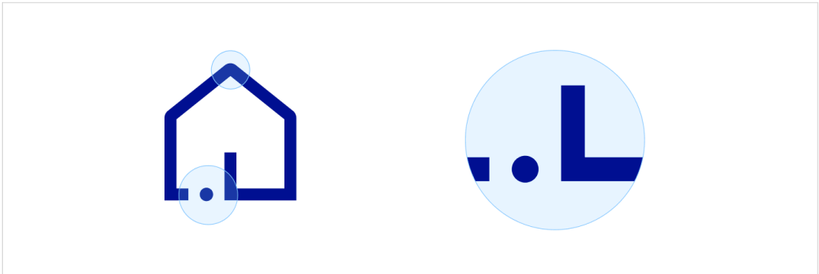
Optical point adjustment

The diameter of the circle should be slightly larger than the stroke. the separation distance is the thickness of the stroke.



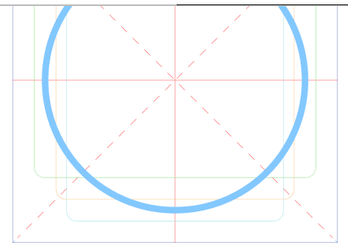
90º corners and other vertices

90º corners must always be joined with a right angle.Exceptions can be made if the actual physical object already has rounded corners; allother verticals must be rounded.

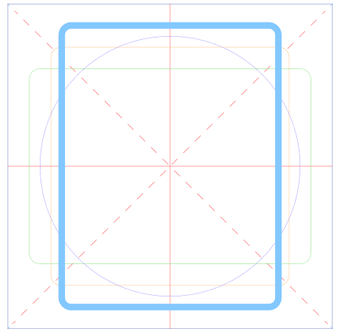


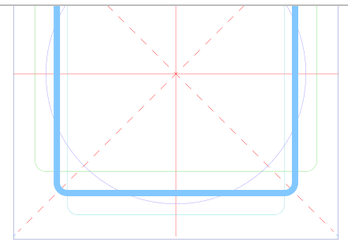
Key-line Shapes

The optical alignment grid consists of four possible safety margins that must not be exceeded. The margin that fits the aspect-ratio of the piece we want to create should be use.

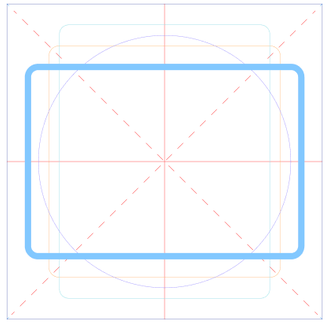


VERTICAL





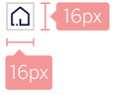
LANDSCAPE



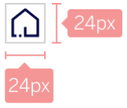
Size

The size of the icons can have a maximum of 80px and a minimum of 16px.

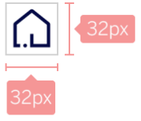
S - 16PX



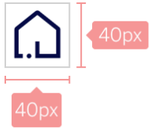
M - 24PX



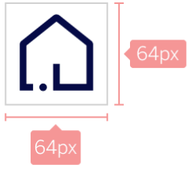
L - 32PX



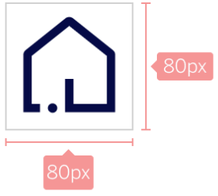
XL - 40PX



2XL - 64PX



3XL - 80PX



Commonly Used Icons

We have a long repository of icons to try and accommodate to any design or content needs however, some icons are used more readily than others. Below is a list of the most commonly used icons and their use cases.

Usage

Use Cases

Close Icon inside a Panel Container or a Carousel

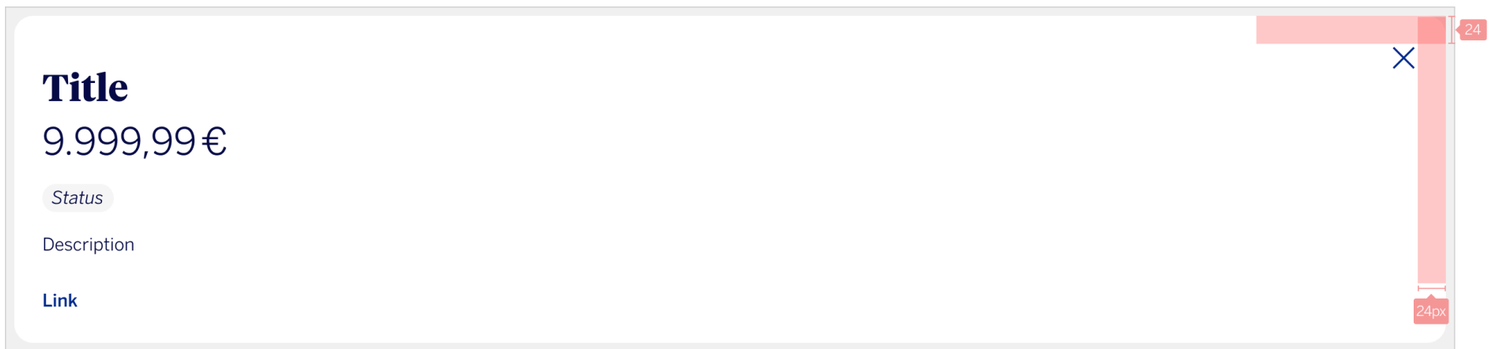
The paddings and the size of the close icon of the Panel Container and the Carousel depend on whether the added component has an image or not. If it has an image, the close icon will appear with a background. The following cases are shown in the Panel Container and the Carousel.

Example of a component without an image inside a Panel Container

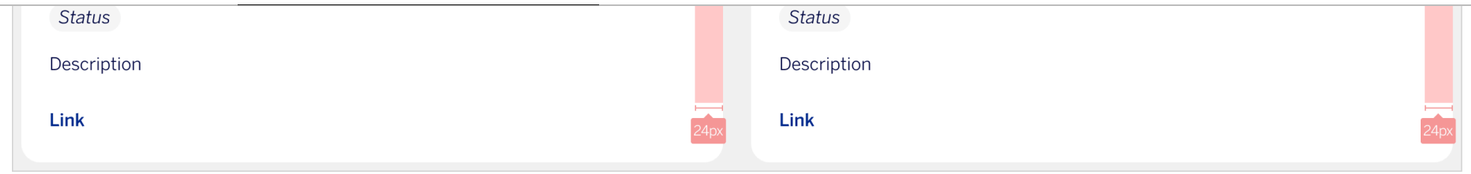
DESKTOP

The padding around the icon will always be 24px regardless of the number of cards or columns, and the size of the icon will be 24x24px

ONE CARD



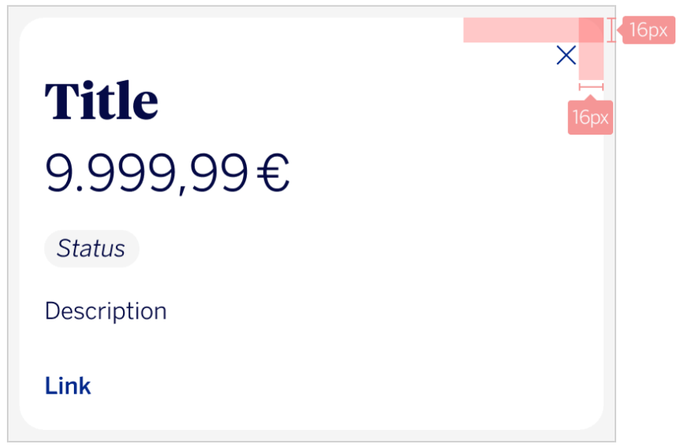
TWO CARDS



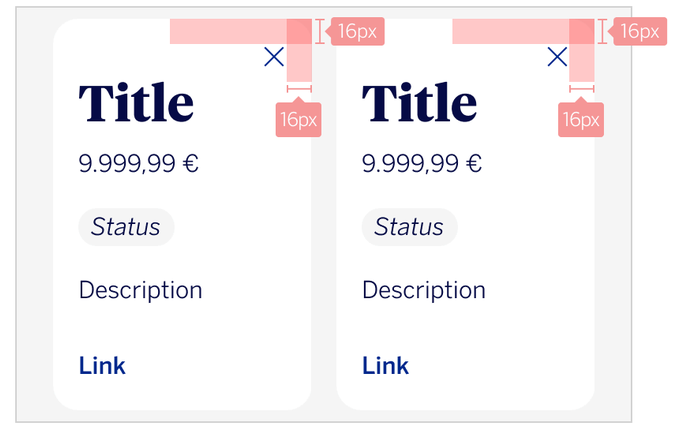
MOBILE

The padding around the icon will always be 16px regardless of the number of cards or columns, and the size of the icon will be 16x16px

ONE CARD



TWO CARDS

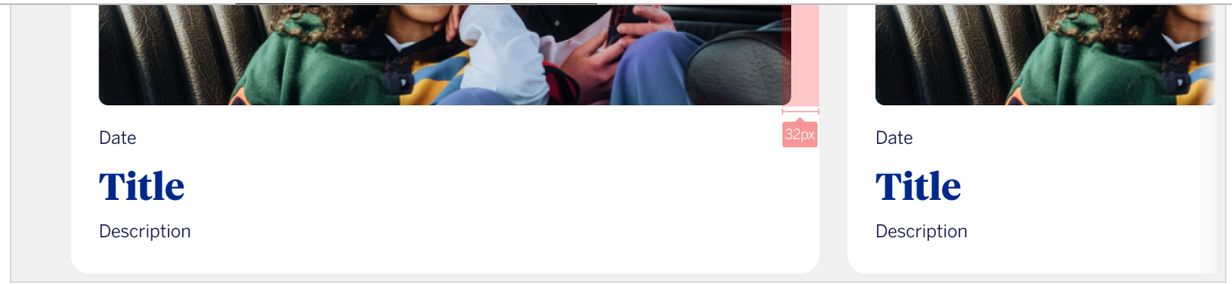


Example of a component with an image inside a Carrousel

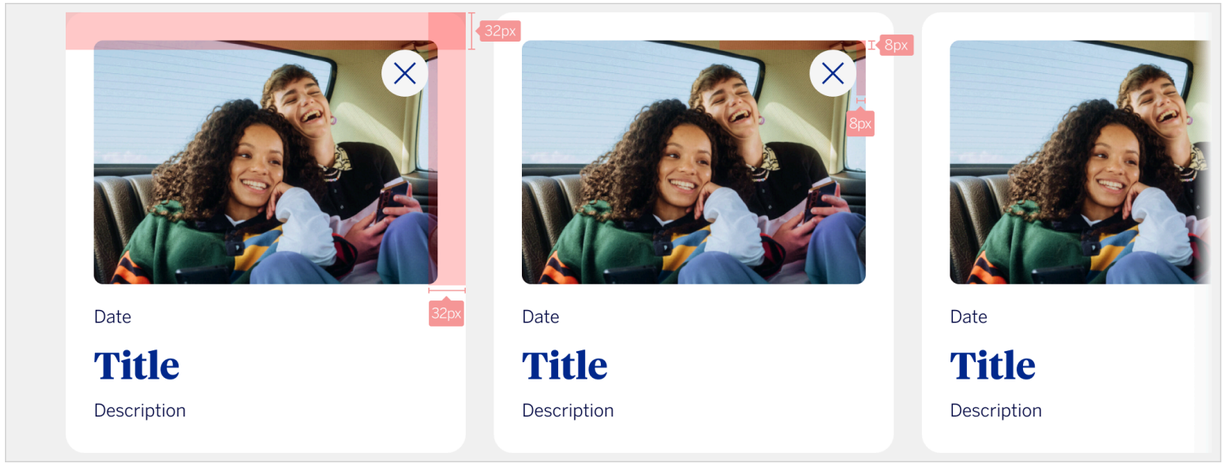
DESKTOP

The padding around the icon will always be 32px regardless of the number of cards or columns, and the size of the icon with background will be 40x40px

TWO COLUMS



THREE COLUMS

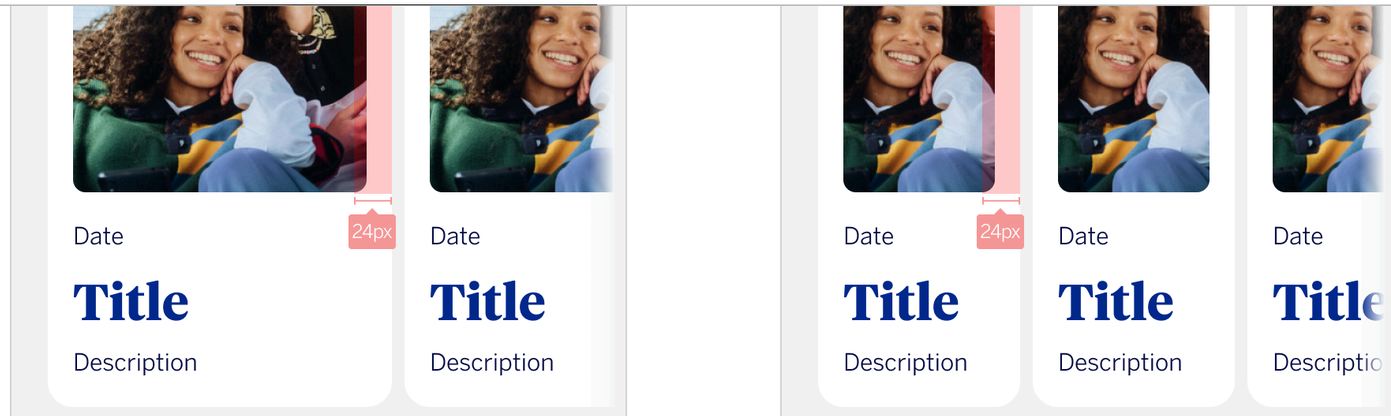


MOBILE

The padding around the icon will always be 24px regardless of the number of cards or columns, and the size of the icon with background will be 32x32px

TWO COLUMS

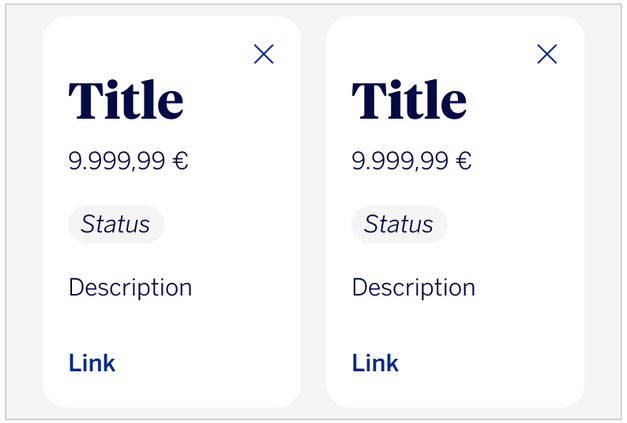
THREE COLUMS



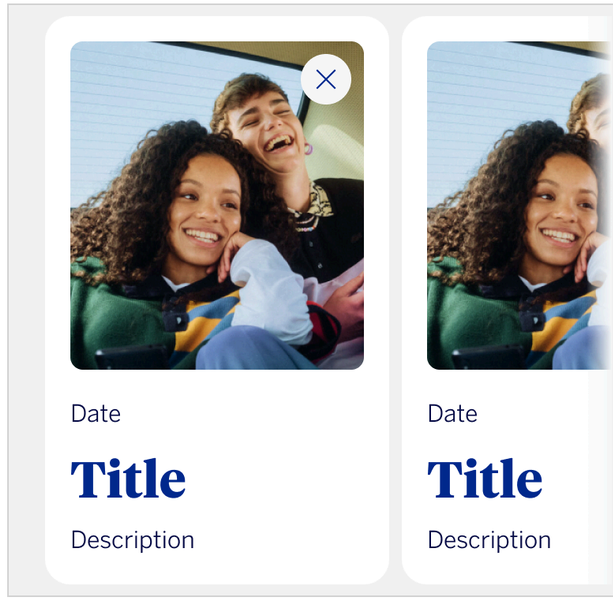
The background of the Close Icon

When the Close icon is over an image we add a background to the icon, this will have a color of BBVA Grey 200 #F7F8F8 while the icon will always have the color BBVA Electric Blue #00288F

WITHOUT IMAGE



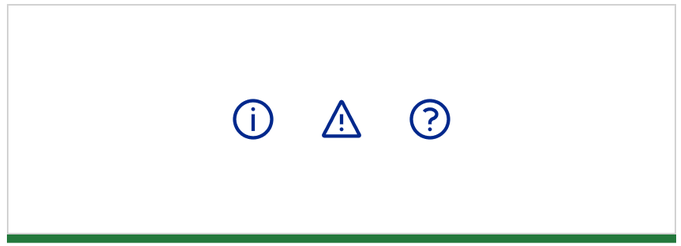
WITH AN IMAGE



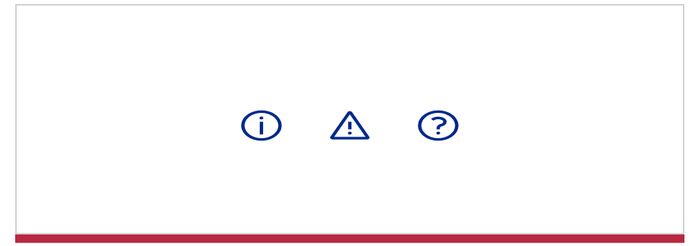
Do and Don´t

Proportion

All icons are designed in within a square bounding box – a 1:1 ratio must be kept when resizing.



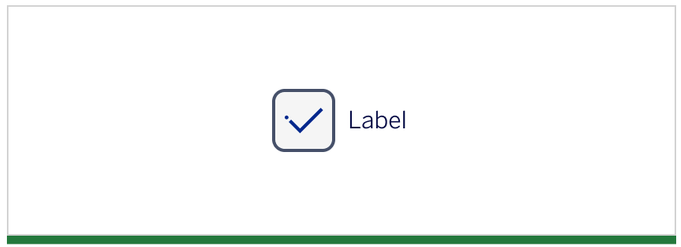
DO



DON'T

Purpose

In order to keep logical interactions, be sure to use icons that correspond to its content or purpose.



DO

DON'T
